ASX ANNOUNCEMENT

7 December 2020

DRILLING COMMENCES – TUCKLAN PROJECT

Sultan Resources Ltd (**Sultan** or the **Company**) is pleased to announce that following drill rig mobilisation, drilling successfully commenced last week at its 100% owned Tucklan Project in the east Lachlan fold belt, NSW.

As previously announced on 30 November 2020, the maiden drill programme is for up to 3,800m of RC drilling across up to 12 holes, with possible diamond tails. The initial phase of the programme is expected to take approximately 20 days.

Tucklan is a large-scale epithermal gold and gold-copper porphyry target defined by exceptional groundwork results and IP. For further details of the Tucklan target and the drill programme, please see the Company's ASX releases dated 2 June, 2020, 20 October, 2020 and 22 October 2020.

Tucklan is the Company's maiden drill programme in the east Lachlan fold belt. This programme marks the beginning of an exciting period for the Company as it also works toward drilling copper-gold targets at its Big Hill tenure in the east Lachlan fold belt in Q1, 2021.

Authorised on behalf of the Board

Mauro Piccini
Company Secretary
